

**ATLP statement regarding COVID 19 and vaccinations  
September 2021**

**Any vaccination programme in schools is arranged by the health authorities as opposed to the School. They manage the consent and administration of the actual vaccines.**

**In respect of vaccinations relating to COVID 19, decisions concerning these are made by the Government and their Health advisors. We are not aware that any decision has been taken to arrange compulsory vaccinations in schools at this time and our schools have not promoted or encouraged the same. We would therefore suggest that any enquiries about this are directed to the Department for Education or Public Health England.**

**In the event that the Government wishes to engage schools within any vaccination programme, we would of course liaise with parents and students in respect of the same.**
